## Water Colors of Egypt and Jerusalem

*By* Taber Sears

These water color paintings are the outcome of a recent visit by the artist to Egypt, Jerusalem, Madeira and Algiers. Those of the Nile represent aspects of the river as far south as the Second Cataract, at Wadi Halfa, 740 miles from the Delta, and the northern terminus of the Sudan Railway. It is the second exhibition of the kind which he has held, the first being from the Western Mediterranean only. They have been done in vacation intervals of a professional life devoted largely to mural painting, examples of which may be seen in various public buildings in New York City and elsewhere.

Mr. Sears is a member of the American Water Color Society, the Water Color Club, the Society of Mural Painters and is the President of The Municipal Art Society of New York City.
